TechAlert Device Forwarding User Guide-ACAP

TechAlert · https://vettedsecuritysolutions.com/docs/techalert-device-forwarding-user-guide-acap/

This guide explains what Device Forwarding is and how to use it in TechAlert. Device Forwarding lets you open the web page of equipment that sits behind a TechAlert host, such as a power relay, camera or network switch inside a trailer, without traveling to the site and without connecting a laptop to its network.
