

QUICK DEPLOY ALPR CAMERA SYSTEMS

VETTED'S QUICK DEPLOY ALPR CAMERA SOLUTIONS DELIVER RAPID INSIGHT SO YOU CAN FOCUS ON YOUR INVESTIGATIONS.

Vetted's suite of Quick Deploy ALPR Cameras features rapid installation and setup with the latest optical technology for scanning vehicles day and night.

Featuring high-performance license plate scanning capabilities, Vetted's ALPR Quick Deploy camera solutions are built for rapid deployment and designed to capture plate images day or night, over multiple lanes, and at various speeds. Configure customized hotlists with data from national databases, as well as create and share your own lists to transform your data into investigative leads. Boost your investigative initiatives even more with Vigilant's LEARN analytics platform to transform large amounts of data into actionable intelligence.

Ready for Any Deployment

Vetted's robust Quick Deploy ALPR camera systems are ready for permanent or temporary deployments. With features like rapid install and versatile power options, our suite of Quick Deploy ALPR cameras delivers functional options to turn any deployment into a successful mission.

Designed for Precision Scanning

Capture precise images in light or complete darkness with Vetted's Quick Deploy Camera Enabled IR Night Vision and sophisticated number plate recognition. These Quick Deploy systems include coverage of 1-2 lanes while scanning valuable vehicle details such as make, model, and color.

Configured for Valuable Analytics

Custom hotlists, real-time alerts, and comprehensive search and report capabilities are just a few of the valuable analytics included with Vetted's Quick Deploy ALPR camera systems. Create and share hotlists with other agencies and download data from national databases such as NCIC to close more cases.

MOTOROLA QUICK DEPLOY CAMERA SYSTEMS

Model #	Motorola L50	Motorola L60
Part #	VSS-L50	VSS-L60
Highlighted Features	Small form-factor camera with solar-panel and integrated battery	Quick Deploy system with small form-factor and integrated battery
Use Setting	Neighborhood	Neighborhood, Business Districts
Lane Coverage	1 Lane	2 Lanes
Max Capture Speed	85 mph	75 mph
Optic Capture Range	12-75 ft, optimal 50 ft	12-75 ft, optimal 30 ft
Environmental Ratings	IP66	IP67
Power System	Onboard battery system with solar recharging AC/DC or solar. 10W, 108Wh Battery Capacity	12V 18Ah Lithium-Ion battery system with solar recharging high-capacity, swappable internal battery along with solar and AC/DC direct line power options. 40W, 18Ah Battery capacity
Solar Panel Unit	Integrated solar recharging	Optional solar recharge panel Part # VSF-L60-S-KIT
Mounting Accessories	Includes pole or surface mounting hardware
