

ALPR SPEED TRAILER

VETTED'S ALPR SPEED TRAILER DELIVERS ROADSIDE VEHICLE INTELLIGENCE WHEN AND WHERE YOU NEED IT.

Combine the power of automated license plate recognition (ALPR) with speed capture technology for safer roadways.

Each unit is equipped with a posted speed limit sign and options for K-band radar with a digital display to increase driver speed awareness. Digital displays show bold numeric characters or short, excessive-speed messages to deter unsafe speeds. These systems are designed to be deployed by a single officer and feature a touchscreen control unit to easily configure speed settings and warning messages. Complete with onboard batteries and solar recharging, these trailers are ideal for short and long-term interdiction and investigatory missions alike.

Designed for Rapid Setup

Vetted's ALPR Speed Trailers are designed for portability. Built for rapid, effortless deployment these compact and lightweight trailers are easy to tow and utilize a simple winch system enabling a single-person setup scenario. Plus, the onboard touch screen control and keyboard make setup a breeze.

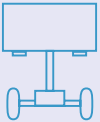

Built to Endure

These DOT-approved trailers are roadside ready and employ a continuous welded steel frame design and aircraft-grade powder coat finish to withstand the elements. The battery box and ALPR controls are enclosed in a ventilated and secured cabinet.

Ready to Serve, Day In and Day Out

With Vetted ALPR Speed Trailers, you can choose between the Lite, Standard, or Long Run options to match the speed trailer to your mission based on the battery system, solar options, runtime ranges and array of safety and system management features.
