

TECHALERT

MONITOR THE HEALTH OF IP-CONNECTED DEVICES TO MINIMIZE SYSTEM DOWNTIME AND SITE VISITS.

TechAlert, powered by FINDER® Software Solutions, is a web-based application that allows system administrators and authorized users to view the status and health of their IP-connected field hardware devices in a single, simple-to-use interface.

OUR PLATFORM

TechAlert monitors fixed or trailer license plate readers, CCTV cameras, wireless radios, trackers, or other IP-connected devices.

TechAlert monitors each system's power supply, battery, solar recharging performance, CPU, modem, and network communications.

TechAlert efficiently monitors all key hardware and software, providing automated alerts and awareness to keep you informed.

SELF-CORRECTIVE

Self-corrective issue resolution to minimize field visits.

MULTI-CHANNEL ALERTS

Email and text alerts to notify multiple agency administrators.

FULL CUSTOMIZATION

Customized support for unusual and non-standard devices.
