

CROWDALERT

Crowd Density Solution

REAL-TIME, INTRICATE UNDERSTANDING OF CROWD LEVELS, CONCENTRATIONS, AND ATTENDEE BEHAVIORS

KEY FEATURES

OVERCROWDING MANAGEMENT

Advanced technology and strategic planning to control crowd density, ensuring safety and efficiency

AUTOMATED CROWD COUNTS

Instantly track, anticipate, and respond to real-time density levels to maintain safe occupancy volumes

USER-DEFINED GEO ZONES

Create custom geographic areas for precise control over occupancy levels and limits

CUSTOM ALERTS & NOTIFICATIONS

Real-time alerts and notifications on density data, enabling precise crowd control and proactive responses

CrowdAlert serves as a digital sentinel, utilizing computer vision processing for people counting and density assessments of predefined areas, featuring automated incident creation for quick decisions and proactive safety protocol adjustments.

Precisely tracking density levels per square meter, CrowdAlert provides real-time insights for:

- ✓ Actionable intelligence
- ✓ Efficient resource allocation
- ✓ Optimized safety and security
