

CROWDTRACK

Crowd Count & Flow Solution

REAL-TIME COUNTS AND DYNAMIC FLOW ANALYSES FOR INFORMED DECISIONS AND EVENT SPACE OPTIMIZATION

KEY FEATURES

INTELLIGENT SENSORS

Smart sensors for precise data, ensuring accurate crowd counts and flow tracking

DYNAMIC FLOW ANALYSIS

Automated crowd analysis for dynamic flow monitoring, identifying bottlenecks, and optimizing space

ACTIONABLE DATA

Real-time data for proactive safety measures, resource allocation, and historical data for future forecasting

CUSTOM ALERTS & NOTIFICATIONS

User-defined geo zones for precise occupancy control, with tailored alerts and notifications

CrowdTrack delivers smart analytics to efficiently track the count and flow of people throughout a venue or designated areas to identify potential safety hazards, alleviate overcrowding, and monitor chokepoints to maximize the flow of event crowds.

Featuring advanced technology with computer vision, CrowdTrack provides real-time insights for:

- ✓ Actionable intelligence
- ✓ Efficient resource allocation
- ✓ Optimized safety and security
