

NXUS

Unified Command Center Interface

*EFFICIENTLY MANAGE AND MONITOR
VARIOUS SENSORS ACROSS YOUR ENTIRE
VENUE OR ANY DESIGNATED ZONE*

KEY FEATURES

MONITOR & CONTROL

Aggregate venue data in a centralized system to streamline decision-making and resources

AUTOMATED ALERTS

NXUS Alert notifies event personnel and adjusts CCTV cameras to focus on triggered alert areas

REAL-TIME DATA

Control and monitor events with real-time data from multiple sources across your venue

FUTURE PLANNING

Compile data for insights driving future event planning and improving venue safety

NXUS and NXUS Alert empower event staff to efficiently monitor and manage IoT devices, crowd management tools, and traffic metrics from a single command center interface.

- Object Analytics
- Entry & Fence Guard
- Crowd Management
- Loitering Guard

Vetted's NXUS edge-based unified command dashboard promotes:

- ✓ Resource coordination with field data
- ✓ Communication and info sharing
- ✓ Optimized safety and security
