

# QUEUESMART

Queue Analysis Solution

*ELEVATE EVENT QUEUE MANAGEMENT  
WITH ADVANCED ANALYTICS TO ENHANCE  
OPERATIONAL EFFICIENCY*

## KEY FEATURES

### OBJECT ANALYTICS

AI based object tracking for instant visibility into queue lengths and dynamics for optimal management

### REAL-TIME MONITORING

Real-time queue visibility enabling informed decisions on resource allocation and management

### CUSTOMIZED ALERTS

Notifications based on predefined criteria, enabling swift response times to changing queue conditions

### OPERATIONAL EFFICIENCY

Minimize congestion by optimizing resource allocation through real-time insights into queue dynamics

QueueSmart delivers advanced technology to go beyond simple wait time monitoring with smart analytics for efficient queue management, enhancing customer satisfaction and optimizing service operations.

Featuring advanced technology, QueueSmart provides real-time insights for:

- ✓ Reduced wait times
- ✓ Minimized congestion
- ✓ Optimized safety and security
