

TECHALERT

*MONITOR THE HEALTH OF IP-CONNECTED DEVICES
TO MINIMIZE SYSTEM DOWNTIME & SITE VISITS.*

KEY FEATURES

SELF CORRECTIVE

Self-corrective capabilities to minimize field visits

MULTI-CHANNEL ALERTS

Email & text alerts to notify multiple agency administrators

OPERATIONAL EFFECTIVENESS

Streamlines operations while ensuring tactical precision

FULL CUSTOMIZATION

Customized support for unusual and non-standard devices

TechAlert is a web-based platform that provides real-time visibility into the health and performance of IP-connected field devices—including trailers, LPRs, cameras, radios, and more.

Monitoring critical components like power, solar input, CPU, and network connectivity, TechAlert includes self-corrective functions to minimize downtime, maximize operational efficiency, and reduce unnecessary site visits—all through a simple, centralized interface.
